## Skipjack MINNIE V.

### **Architectural Survey File**

This is the architectural survey file for this MIHP record. The survey file is organized reverse-chronological (that is, with the latest material on top). It contains all MIHP inventory forms, National Register nomination forms, determinations of eligibility (DOE) forms, and accompanying documentation such as photographs and maps.

Users should be aware that additional undigitized material about this property may be found in on-site architectural reports, copies of HABS/HAER or other documentation, drawings, and the “vertical files” at the MHT Library in Crownsville. The vertical files may include newspaper clippings, field notes, draft versions of forms and architectural reports, photographs, maps, and drawings. Researchers who need a thorough understanding of this property should plan to visit the MHT Library as part of their research project; look at the MHT web site ([mht.maryland.gov](http://mht.maryland.gov)) for details about how to make an appointment.

All material is property of the Maryland Historical Trust.

***Last Updated: 04-05-2004***

MINNIE V (skipjack)  
Tilghman, Maryland

MINNIE V is a 45.3' long two-sail bateau, or V-bottomed deadrise type of centerboard sloop, commonly referred to as a skipjack. She has a beam of 15.7', a depth of 3', and a net registered tonnage of 8. She carries a typical skipjack rig of jib-headed mainsail and a single large jib with a club on its foot. Originally built in 1906 in Wenona, Maryland following traditional Bay design and construction methods, she was rebuilt along her original lines in 1980 by Melbourne Smith. MINNIE V is significant as being one of the 35 surviving traditional Chesapeake Bay skipjacks and a member of the last commercial sailing fleet in the United States. She is of special interest for being owned by the City of Baltimore and operated both in the working oyster fleet and as a summer passenger and educational vessel in Baltimore's Inner Harbor.

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

This vessel is a 45.3-foot long, two-sail bateau, or V-bottomed deadrise centerboard sloop, commonly referred to as a "skipjack." She is built in Bay fashion using cross-planked construction methods. She has a beam of 15.7 feet and a depth of 3 feet with a net registered tonnage of 8 tons. Originally built in 1906 in Wenona, Maryland for the oyster-dredging fleet, she was refurbished in the 1970s and rebuilt along her original lines in 1980. She carries a typical skipjack rig with a jib-headed dacron mainsail laced to the boom and carried on wood hoops at the mast, and a single large dacron jib with a club at its foot. The vessel is painted white.

The vessel has a longhead bow with a raking stem and a transom stern with a slightly rounded top. The rudder is carried outboard on pintles mounted to the transom and enclosed by a box. The vessel has slightly flaring bows. Her wooden hull is sheathed with metal and painted below the waterline with copper bottom paint.

MINNIE V. has flush decks, with several deck structures. From the stern forward, these include: a cabin with a roof about two feet off the deck; an engine hatch cover; and a forward hatch leading to ballast and storage below. There is a box over the steering gear located at the after-rail. Fittings include pipe davits for a pushboat, which is suspended over the stern; the wheel, mounted on the steering box; a jig for the pushboat on the transom; a compass mounted on the cabin roof, and winches forward. There is high pipe railing surrounding the decks aft. The pushboat was built by Captain Ed Farley, owner of the STANLEY NORMAN, in the summer of 1983.

The single mast is raked aft about 15°, and set up with double shrouds and deadeyes on port and starboard rails. Other rigging includes a forestay, jibstay, topping lift, and lazyjacks for both jib and mainsail. The bowsprit is octagonal forward of the stem and tapers towards its end; it is set up with one chain and one chain-aqd-cable bobstay and two bowsprit stays. The vessel's original boom was replaced with a new boom in the fall of 1983. In addition to her pushboat, this vessel is motorized with a Gray inboard auxiliary engine (conforming to Coast Guard regulations for the carrying of passengers).

Decorations include trailboards on the longhead with the name MINNIE V in gold, American flags, and gold-leaf vines. There is also an eagle billet-head on her longhead.

Prepare both a summary paragraph of significance and a general statement of history and support.

This vessel is significant as being one of the 35 surviving traditional Chesapeake Bay skipjacks and a member of the last commercial sailing fleet in the United States. Out of a fleet of hundreds of skipjacks that worked Bay waters in the early years of this century, today only this small number remain to carry on the tradition of working sail.

The skipjack evolved as a distinct type of Bay vessel in the 1890's as a cheaper-to-construct alternative to the earlier bugeyes and other traditional framed craft, in a period when shipbuilding costs were rising and the oyster catch was diminishing. The type was devised by enlarging (to 25 to 60 feet) the hull of the ordinary, unframed, square-sterned Bay crabbing skiff, and giving it a deadrise bottom, a-deck, a cabin, and a sloop rig. The result—with its unframed, hard chine, cross-planked, V-bottom—proved inexpensive to build, easy to repair, and could be constructed by a competent house carpenter. Skipjacks were specifically designed as oyster dredge boats, with wide beams and low freeboard lending stability and providing a large working space on deck. The single masted rig, with sharp-headed mainsail and large jib, was easy to handle, powerful in light winds, and handy in coming about quickly for another pass over the oyster beds.

The Maryland oyster season begins November 1 and ends March 15. Skipjacks must dredge under sail on all days except Mondays and Tuesdays, when they are allowed to use their motorized pushboat for dredging. The pushboat, normally carried on davits at the stern, is lowered into the water and literally "pushes" the skipjack along from behind, the nose of the pushboat resting against a "jig" on the stern of the skipjack. The pushboat can also legally be used to get the skipjack to and from the oyster beds each day. Each skipjack's crew is made up of the captain, who is often also the owner, and five crew members.

MINNIE V is of special interest as being owned by the City of Baltimore and operated both in the working oyster fleet and as a summer passenger and educational vessel in Baltimore's Inner Harbor. Originally built in 1906 in Wenona, Maryland, the MINNIE V was rebuilt in 1980-81 at Baltimore's Inner Harbor along her original lines and she re-joined the oyster fleet in 1982 after a 10+ year hiatus. Her rebuilding was supervised by noted marine artist and designer Melbourne Smith, designer of the PRIDE OF BALTIMORE, built on the same Inner Harbor site, and using many of the same shipwrights, as the MINNIE V. At the same time MINNIE V was rebuilt, a new skipjack based on her lines was built, the ANNA McGARVEY. Both are now active in the oyster fleet, based at Tilghman Island.
